Ashtakavarga

Ashtakavarga is a unique method used to know the strength of each house based on the positions of the Ascendant, Sun, Moon, Mars, Venus & Mercury. Astakavarga method divides each Rashi house into subdivisions based on the position of Ascendant & 7 planets. Rahu & Ketu are omitted in calculations as these are not real planets instead they are the nodes of the Moon which are formed during its orbit in the ecliptic plane

The common rules that are taught for Ashtakavarga are: Below 25 is weak, 25 to 28 is average, above 28 is good, when planets transit a house about 30 points they bring about positive results, if planets transit a house with below 25 points results may not be good. Please note this is, in general, whereas the predictions may vary depending on various other qualifiers that your astrologer able to analyze better.

Shadbala

Shadbala is a mathematical model to quantify the strength attained from 6 different sources 1) Sthanabala/Positional Strength 2) Dikbala/Directional Strength 3) Kalabala/Temporal Strength 4) Chestabala/Motional Strength 5) Naisargabala/Natural Strength 6) Drgbala/Aspectual Strenght. Parasara in BPHS calls the Shad Bala “Spashta Bala” which means distinct strength. This gives light to the fact that each strength should be evaluated individually and that the sum total of the “Shad Bala” of the planets is less important than each distinct strength on its own

BPHS 27.34–36: Minimum Prescribed Strength: Guru, Budha, and Sūrya are strong, if each of their Sthanabala, Dikbala, Kalabala, Cheshtabala, and Ayanabala are, respectively, 165, 35, 50, 112 and 30 Virupas. The same required for Chandra and Śukra are 133, 50, 30, 100, and 40. For Mangal and Shani, these are 96, 30, 40, 67 and 20.bala

BPHS 27.32–33: Minimum Shadbala Requirement: 390, 360, 300, 420, 390, 330, and 300 Virupas are the Shadbala Pindas, needed for Sūrya, etc. to be considered strong. If the strength exceeds the above-mentioned values, the Graha is deemed to be very strong. If a Graha has the required Shadbala, it proves favorable to the native by virtue of its strength. However, Śani's extreme strength gives long life as well as miseries.

Planetary Aspects

Trine(Δ) Mars Trine Venus You're attractive, genial, loving, and likely to find romantic fulfillment

Sextile(✱) Sun Sextile Moon you're genial and energetic. Opportunities come your way. All things being equal, you're basically at peace with yourself. Consider yourself blessed. Mercury Sextile Moon You think clearly, communicate effectively, make good use of humor, and have an excellent memory

Conjunction(♌) Mercury Conjunction Sun You're an adventurer with energy, courage, and strong passions – sexual and otherwise. You're enterprising, competitive, and willing to take the initiative – a contender in every way

Opposition(♎) Saturn Opposition Jupiter A tug of war between the forces of expansion and the forces of restriction keeps you off balance. Restlessness, discontent, bad timing, and tension may plague you. On some deep level, you fear that your judgment is unreliable, and your confidence suffers accordingly. The opposition between Jupiter and Saturn comes around approximately ten years after the conjunction: in 1911, 1930–1931, 1951–1952, 1970–1971, 1989–1990, and 2010

Square(□) Moon Square Jupiter It's all or nothing with you. You're ecstatic or grief-stricken, blissed out or on the verge of collapse. In short, you have trouble controlling your feelings and you tend to go overboard. Jupiter Square Mars Restless and extravagant, you have stamina and drive, but moderation, though frequently recommended, isn't your way

Vimshottari Dasha

The Sanskrit term dasha in Hindu astrology is used to indicate planetary periods, The Dasha Paddhati (system) of Directional Astrology is unique to the Hindus; it is found nowhere else. There are many kinds of Dasha systems, Parashara mentions forty-two of them, but of these only two are in vogue, namely, Vimshottari and Ashtottari

Vimshottari in Sanskrit stands for the number 120. Vimshottari Dasha assumes that the maximum duration of life of an individual human being is 120 years which is the aggregate duration of all nine planetary periods i.e. Ketu 7, Venus 20, Sun 6, Moon 10, Mars 7, Rahu 18, Jupiter 16, Saturn 19 and Mercury 17, in the order of their operation. It is not known when this system was discovered and why the number of years allotted to each varies. The year of the Vimshottari dasha is the astronomical solar year of 365.25 days

In fact it provides strong power to a person to face all sorts of struggles in life so that he may excel and achieve success. People with this Yoga are generally seen to be excellent Generals, Ministers, Councillors, Advisors, Teachers, Professors, Coaches and highly paid & in-demand consultants. The general idea is that they may not be in 'one opinion within' for their own life but are the best people to seek advice from. For example: A person with this Yoga may not be a great soccer player being an average implementer however due to the deep knowledge of technique might guide someone to become one of the best soccer players in the Century. Most phenomenal Astrologers who have contributed to groundbreaking discoveries were born with this Yoga. It is believed that people with such type of a planetary setting, when once channelize their energy and calm the chattering mind either with meditation, yoga, mantra recitation, etc. - they can learn and store 'the entire knowledge available to humanity ever' which is what had made them great advisors & gurus throughout the history. A key distinguishing factor in such individuals is that they are theoretical gurus of all trades but average or below average implementers of that knowledge. These individuals when clubbed with an equally good implementer (who readily accepts 'a person with this Yoga' as his teacher), results in a highly successful union which is an unstoppable team in every aspect
